INDUSTRIAL SAFETY AND HEALTH PROGRAM

Aligned with AGC Construction Safety Excellence Awards (CSEA) Best Practices

OSHA 29 CFR 1926 | WAC 296-155 (WISHA) Compliant

Company: MH Construction, Inc.

Address: 3111 N. Capitol Ave., Pasco, WA 99301

Phone: (509) 308-6489

Email: office@mhc-gc.com

Website: www.mhc-gc.com

Owner: Jeremy Thamert

Revision: 2 (AGC Standards Update)

Effective Date: 04/07/2026

"Building projects for the client, NOT the dollar."

Core Values: Integrity | Honesty | Professionalism | Thoroughness

MISH 44	Silica Exposure Control	2	04/07/2026

SUMMARY OF CONTENTS

This Safety Program is aligned with AGC Construction Safety Excellence Awards (CSEA) Best Practices and OSHA Recommended Practices for Safety and Health Programs in Construction. All procedures comply with 29 CFR 1926 and WAC 296-155 (WISHA) requirements.

MISH 01 Injury Free Workplace Plan — Senior Management Ownership and Participation

Establishes the Injury Free Workplace philosophy, defining leadership commitment, behavioral expectations, and the 14-point plan for zero-incident project execution.

MISH 02 Drug Free Workplace — Worker Engagement, Involvement, and Participation

Defines the Drug Free Workplace policy including pre-employment, random, post-incident, and for-cause testing protocols per DOT and company standards.

MISH 03 Program Policy and Requirements — Senior Management Ownership and Participation

Outlines the overall program policy, scope, and regulatory framework governing the Industrial Safety and Health Program in compliance with OSHA/WISHA.

MISH 04 Safety and Health Orientation — Safety Training and Validation of Training

Details new-hire and site-specific safety orientation requirements, documentation procedures, and competency verification standards.

MISH 05 Pre-Job Safety Planning — Safe Work Methods (Planning and Validation of)

Describes the pre-job safety planning process including Job Hazard Analysis (JHA), Activity Hazard Analysis (AHA), and 3-week look-ahead planning.

MISH 06 Emergency Response — Emergency Response and Crisis Management

Establishes emergency response procedures for medical emergencies, fires, severe weather, chemical spills, and evacuation protocols.

MISH 07 Safety Bulletin Boards — Worker Engagement, Involvement, and Participation

Specifies requirements for safety bulletin board placement, required postings, and communication of safety information on all project sites.

MISH 08 Event Reporting of Incidents, Accidents, and Near Misses — Risk Identification and Analysis

Defines incident, accident, and near-miss reporting procedures including investigation protocols, root cause analysis, and corrective action tracking.

MISH 09 Safety and Health Meetings/Inspections — Worker Engagement, Involvement, and Participation

Establishes requirements for weekly safety meetings, toolbox talks, site inspections, and documentation of safety communication activities.

MISH 10	**Personal Protective Equipment**	Task Design - Engineering Controls
	Specifies PPE requirements including hard hats, eye protection, gloves, footwear, hearing protection, and high-visibility apparel standards.	
MISH 11	**Fall Protection**	Task Design - Engineering Controls
	Defines fall protection requirements for work at heights including guardrails, personal fall arrest systems, safety nets, and controlled access zones.	
MISH 12	**Flammable and Combustible Liquids**	Safe Work Methods (Planning and Validation of)
	Establishes safe handling, storage, and use procedures for flammable and combustible liquids per NFPA and OSHA standards.	
MISH 13	**Fire Prevention**	Emergency Response and Crisis Management
	Outlines fire prevention measures including hot work permits, fire watch requirements, extinguisher placement, and housekeeping standards.	
MISH 14	**Welding, Cutting, and Heating Operations**	Safe Work Methods (Planning and Validation of)
	Defines safety requirements for welding, cutting, and heating operations including hot work permits, ventilation, and fire prevention measures.	
MISH 15	**Lock and Tag (Lockout/Tagout)**	Safe Work Methods (Planning and Validation of)
	Establishes lockout/tagout procedures for the control of hazardous energy during equipment servicing and maintenance activities.	
MISH 16	**Confined Space Entry**	Safe Work Methods (Planning and Validation of)
	Defines confined space entry procedures including atmospheric testing, permits, attendant duties, and rescue planning requirements.	
MISH 17	**Use and Care of Ladders**	Task Design - Engineering Controls
	Specifies requirements for ladder selection, inspection, setup, use, and care in compliance with OSHA 1926.1053 standards.	
MISH 18	**Motor Vehicle Safety Program**	Safe Work Methods (Planning and Validation of)
	Establishes motor vehicle safety requirements including driver qualification, vehicle inspection, seat belt use, and distracted driving prevention.	
MISH 19	**Equipment Maintenance and Inspection**	Risk Identification and Analysis
	Defines equipment maintenance and inspection schedules, documentation requirements, and operator qualification standards.	
MISH 20	**Aerial Lifts and Elevating Work Platforms**	Task Design - Engineering Controls
	Specifies safety requirements for aerial lifts and elevating work platforms including operator training, inspection, and fall protection.	

MISH 21	**Crane Suspended Work Platforms**	Task Design - Engineering Controls
	Establishes requirements for crane-suspended work platforms including engineering design, load testing, and operational procedures.	
MISH 22	**Use and Handling of Scaffolds**	Task Design - Engineering Controls
	Defines scaffold erection, use, inspection, and dismantling requirements including competent person designation and fall protection.	
MISH 23	**Industrial Hygiene Program**	Risk Identification and Analysis
	Outlines the industrial hygiene program including exposure monitoring, occupational health hazard assessment, and medical surveillance.	
MISH 24	**Contractor Hazard Communication Program**	Risk Identification and Analysis
	Establishes the Hazard Communication program including SDS management, container labeling, and employee right-to-know training.	
MISH 25	**Heat Related Illness Prevention**	Risk Identification and Analysis
	Defines heat-related illness prevention measures including acclimatization, hydration, rest breaks, and emergency response procedures.	
MISH 26	**Excavation, Trenching, and Shoring**	Safe Work Methods (Planning and Validation of)
	Specifies excavation, trenching, and shoring requirements including soil classification, protective systems, and competent person duties.	
MISH 27	**Construction Equipment Modifications and Fabrication**	Task Design - Engineering Controls
	Establishes requirements for construction equipment modifications and fabrication including engineering approval and documentation.	
MISH 28	**Housekeeping**	Safe Work Methods (Planning and Validation of)
	Defines housekeeping standards for construction sites including material storage, debris removal, and walkway maintenance.	
MISH 29	**Electrical Safety**	Safe Work Methods (Planning and Validation of)
	Outlines electrical safety requirements including GFCI protection, assured grounding, lockout/tagout, and qualified person standards.	
MISH 30	**Signs, Signals, and Barricades**	Worker Engagement, Involvement, and Participation
	Specifies requirements for signs, signals, and barricades including traffic control, flagging operations, and hazard identification.	
MISH 31	**Miscellaneous Construction Requirements**	Safe Work Methods (Planning and Validation of)
	Addresses miscellaneous construction requirements not covered in other sections including general site safety standards.	

MISH 32	**Respiratory Protection**	Task Design - Engineering Controls
	Establishes the respiratory protection program including hazard assessment, respirator selection, fit testing, and medical evaluation.	
MISH 33	**Floor Openings, Open-Sided Surfaces, and Ramps**	Task Design - Engineering Controls
	Defines requirements for floor openings, open-sided surfaces, ramps, and runways including guardrail and cover specifications.	
MISH 34	**Compressed Gas/Compressed Air**	Safe Work Methods (Planning and Validation of)
	Specifies safe handling, storage, and use procedures for compressed gas cylinders and compressed air systems.	
MISH 35	**Rigging**	Safe Work Methods (Planning and Validation of)
	Establishes rigging safety requirements including sling inspection, load calculations, and qualified rigger standards.	
MISH 36	**Hand and Portable Power Tools**	Task Design - Engineering Controls
	Defines safety requirements for hand tools and portable power tools including inspection, guarding, and proper use.	
MISH 37	**Concrete and Masonry Construction**	Safe Work Methods (Planning and Validation of)
	Outlines safety requirements for concrete and masonry construction including formwork, reinforcing steel, and lift-slab operations.	
MISH 38	**Commercial Drivers Drug and Alcohol Program**	Worker Engagement, Involvement, and Participation
	Establishes the commercial driver drug and alcohol testing program in compliance with DOT/FMCSA regulations.	
MISH 39	**Subcontractor Management Plan**	Subcontractor Management
	Defines the subcontractor safety management plan including pre-qualification, site-specific requirements, and performance monitoring.	
MISH 40	**Waste Management Plan**	Risk Identification and Analysis
	Outlines waste management procedures including hazardous waste identification, storage, disposal, and environmental compliance.	
MISH 41	**Short Service Employee Program**	Safety Training and Validation of Training
	Establishes the Short Service Employee program for workers with less than six months of experience including mentoring and oversight.	
MISH 42	**Forklift Truck Safety**	Safe Work Methods (Planning and Validation of)
	Defines forklift and powered industrial truck safety requirements including operator training, inspection, and operating procedures.	

MISH 43	**Bloodborne Pathogens**	Risk Identification and Analysis
	Establishes the Bloodborne Pathogens exposure control plan including universal precautions, PPE, and post-exposure procedures.	
MISH 44	**Silica Exposure Control**	Risk Identification and Analysis
	Defines silica exposure control measures including exposure assessment, engineering controls, respiratory protection, and medical surveillance per OSHA Table 1.
