EVENT REPORTING OF INCIDENTS, ACCIDENTS, AND NEAR MISSES

Document: MISH 08	**Revision:** 2	**Effective:** 04/07/2026	**Approved:** Jeremy Thamert

AGC CSEA Alignment	OSHA Core Element
Risk Identification and Analysis	Program Evaluation and Improvement

1.0 PURPOSE

To define and implement the system for ensuring prompt and correct investigation, notification, and reporting of safety-related events that is in accordance with MH Construction Company requirements.

2.0 RESPONSIBILITY

2.1 MH Construction Key Supervisor shall be responsible for forwarding completed MH Construction Accident Report and all other safety-related documents to MH Construction Safety.

2.2 Personnel must be trained in their roles and responsibilities for incident response and incident investigation techniques.

2.3 Equipment will be provided as needed to investigate an accident which may include some or all of the following items; writing equipment such as pens/paper, measurement equipment such as tape measures and rulers, cameras, small tools, audio recorder, PPE, marking devices such as flags, equipment manuals

2.4 The Key Supervisor shall be responsible for the following event-related activities.

2.4.1 Ensuring that all events are reported immediately to the MH Construction Division Manager and Cooperate Safety.

2.4.2 Required incidents must be reported to applicable regulatory agency(s) within 8 hours of their discovery. Incidents must also be reported to the client as soon as possible, or in a timely manner (within 24 hours of incident).

2.4.3 Ensuring that the event scene is secure from disturbance and unauthorized entry until released by MH Construction Safety.

2.4.4 Assisting MH Construction with the collection of all transient evidence for the investigation and assisting with identification of witnesses.

2.4.5 Conducting investigations in accordance with this procedure.

2.4.6 Preparing reports in accordance with this procedure.

2.5 Employees shall be responsible for the following:

2.5.1 Preventing a second event, fire, injury, or further damage to the extent possible.

2.5.2 Activating emergency assistance systems when required.

2.5.3 Immediately reporting all events/accidents to supervision.

2.5.4 Securing the scene from disturbance and unauthorized entry.

2.5.5 Participating in investigations, as required.

3.0 DEFINITIONS

Event: An unplanned incident (including near miss') affecting employee health and safety or causing property/environment damage.

4.0 GENERAL REQUIREMENTS

4.1 All events, regardless of severity, shall be reported to MH Construction Key Supervisor.

4.2 All events, regardless of severity, shall be investigated and documented.

4.3 MH Construction shall ensure that injury/illness recordkeeping and reporting is performed in accordance with OSHA standards and document this determination.

4.4 MH Construction Safety shall conduct independent investigations on events at the discretion of the Division Manager.

4.5 MH Construction Safety shall review all documents and reports to ensure completeness and meaningful responses.

5.0 PROCEDURE

5.1 Reporting of Accidents/Injuries

Contractor employees receiving personal injury are encouraged to report to the nearest medical care/emergency assistance. All injuries must be reported, to MH Construction Division Manager and Safety Department.

5.1.1 Accident Reporting

5.1.1.1.1 An MH Construction Accident Report shall be completed for any of the following events:

- First Aid Injury
- Personal injury accidents as follows:

■ OSHA Recordable Cases ■ Receive medical attention off site

- Environmental incidents – releases and spills.
- Accidents resulting in property damage.
- Vehicle accidents resulting in damages exceeding $500.
- Near-miss incidents.

5.1.1.2 The Accident Report shall be completed in detail by the Key Supervisor describing the following items:

- Activity in progress at time of accident/incident.
- Events, beginning with initiation of the activity and ending with nature and extent of the injury/damage.
- Accident causes (direct cause, contributory cause, and root cause) including conditions and/or actions and mitigating factors influencing them.
- Corrective action planned and taken to prevent the accident/incident from reoccurring.

5.1.1.3 Within 24 hours of the event, the Accident Report is submitted to MH Construction Safety.

5.1.2 Accident Reports or an in depth report may be required to be documented on the Accident Report form (see 8-A).

5.2 Follow-up Actions for Events/Accidents: The following actions shall be implemented:

5.2.1 Prevent immediate second event, fire, or emergency n the facility and/or area.

5.2.2 Implement rescue procedures and/or appropriate medical care for injured personnel.

5.2.3 Notify MH Construction Division Manager and Safety Department.

5.2.4 Secure the event scene from disturbance and unauthorized entry pending arrival of MH Construction Safety.

5.2.5 Keep equipment or articles involved in the event from being operated, moved, or otherwise altered or repaired.

5.2.6 If determined necessary, obtain photographs of the event scene and any equipment involved, e.g., motor vehicles, excavating equipment, ladders, scaffolds, etc.

5.2.7 Assist MH Construction and/or identify witnesses; secure statements from those who were directly involved or who may have witnessed the event.

5.2.8 With MH Construction, develop plans for the reactivation of the facility, area process, or operations.

5.2.9 If an MH Construction investigation is conducted, assign an individual to serve as liaison to arrange for needed assistance and gathering evidence.

5.2.10 Complete required reports.

5.2.11 Participate in Root Cause Determinations, facilitated by MH Construction Management.

5.3 Tracking and Trending

5.3.1 A lessons-learned shall be generated from all injuries/accidents that are determined recordable or property damage resulting in $1000 of damage. The lessons-learned with be forwarded to all Key Supervisors for discussion in the following safety meetings.

5.3.2 The accident report will be inputted into the Safety departments trending and tracking system to help identify trends.

5.3.3 The trends report will be covered quarterly with Division Managers.

6.0 RECORDS

The following records are submitted to MH Construction and maintained by the in accordance with this procedure:

- Accident Report
- OSHA 300 logs (submit only when requested)
- Lessons Learned
