MH CONSTRUCTION INDUSTRIAL SAFETY AND HEALTH PROGRAM

Title

EQUIPMENT MAINTENANCE AND INSPECTION

Number

Revision 1 Approved By Jeremy Thamert 03/01/2025 Name Date Effective Date 3/1/2025 Page 1 of 9

1.0 PURPOSE

To establish the system to inspect and maintain vehicles and heavy construction equipment.

2.0 RESPONSIBILITY

2.1 The Key Supervisor shall be responsible for the following:

2.1.1 Maintaining vehicles and equipment in accordance with applicable Occupational Safety and Health Administration/Washington Industrial Safety and health Act (OSHA/WISHA) and American national Standards Institute (ANSI) standards.

2.1.2 Conducting inspections of equipment, and correcting deficiencies noted during the inspections.

2.2 Employees shall be responsible for conducting daily inspections of equipment they are operating, and for reporting deficiencies to their supervisor.

3.0 DEFINITIONS

Heavy Construction Equipment: Mobile cranes, crawler cranes, tractors, compactors, fork lifts, graders, scrapers, off-highway trucks, etc.

Motor Vehicles: Any vehicles that operate on a construction site.

Preventive Maintenance: Practice of utilizing periodic inspections, adjustments, lubrication, and minor repair of equipment for the purposes of extending its useful life and reducing the frequency and magnitude of repairs.

Scheduled Maintenance: Regularly scheduled inspections, tests, lubrications, adjustments, cleaning, and tightening of various components of a piece of equipment.

4.0 GENERAL REQUIREMENTS

4.1 Equipment maintenance and inspection shall comply with the following statutory requirements:

- 29 Code of Federal Regulations (CFR) 1926, Subpart O; Motor Vehicles, Mechanized Equipment and Marine Operations
- 29 Code of Federal Regulations (CFR) 1910, Subpart N; Materials Handling and Storage
- 29 Code of Federal Regulations (CFR) 1910, Subpart F; Powered Platforms, Manlifts, and Vehicle-Mounted Work Platforms
- Washington Administrative Code (WAS) 296-155, Part M; Motor Vehicles, Mechanized Equipment and Marine Operations.

4.2 On-site preventive maintenance of equipment and vehicles shall be performed by qualified personnel.

4.3 Motor vehicles and heavy equipment shall be maintained and inspected monthly in conformance to the manufacturer's recommendations, and documented on equipment-specific safety check and/or inspection report forms (see attachments 19-A).

4.4 Prior to heavy equipment being brought onto a project, an inspection of the equipment shall be performed and complete the applicable safety check and inspection report forms. The forms shall be submitted to maintenance department. Deficiencies noted during the inspection shall be corrected prior to the equipment being brought onto the project.

4.5 MH Construction shall notify the owner or general contractor when heavy equipment is to be brought onto a project.

4.6 The key supervisor shall maintain manufacturer's recommendations and inspection checklists onsite for review.

5.0 PROCEDURE

5.1 MOTOR VEHICLES

5.1.1 Vehicles being operated shall be checked at the beginning of each shift to ensure that the following parts, equipment, and accessories are in safe operating condition and free of apparent damage that could cause failure while in use.

- Brakes (including trailer brake connections, parking brake, and emergency stopping systems.
- Tires
- Horn
- Steering mechanism
- Coupling devices
- Seat belts
- Operating controls
- Safety devices

5.1.2 Lights, reflectors, windshield wipers, defrosters, fire extinguishers, steps, and hand-holds for vehicle access shall also be inspected where such equipment is necessary.

5.1.3 Defects noted during the motor vehicle inspection shall be corrected before the vehicle is placed into service.

5.2 HEAVY CONSTRUCTION EQUIPMENT: The following are specific requirements relating to heavy equipment.

5.2.1 Crawler, locomotive, and truck cranes in use shall meet the applicable requirements for design, inspection, construction and testing, maintenance and operation as prescribed in the ANSI B30.5.

NOTE: Daily inspections shall be conducted on all critical items such as brakes, crane hooks, ropes, hydraulic and pneumatic cylinders, and hydraulic and pneumatic relief pressure valves. These inspections shall be documented and the records kept available for review.

5.2.2 Lift Trucks: Operation of powered industrial trucks may be hazardous if maintenance is neglected or repairs, rebuilds, or adjustments are not performed in accordance with the manufacturer's design criteria.

5.2.2.1 A scheduled, planned maintenance, lubrication, and inspection system shall be followed on all powered industrial trucks.

5.2.2.2 In an industrial truck is found to be in need or repair or is in any way unsafe or contributes to an unsafe condition, the truck shall not be operated until it has been restored to safe operating condition.

5.2.2.3 Only qualified operators are allowed to operate lift trucks.
