

CONTROLLED ENTERPRISE DOCUMENT

MH Ecosystem Governance And Document Control Standard

MH Construction, INC Enterprise Management System

Document family: CORE DOCTRINE

Document title: MH Ecosystem Governance And Document Control Standard

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

MH Ecosystem Governance and Document Control Standard

Version 1.0 | Rough Draft | Effective date pending approval

Control Role	Assigned
Author / Chief Editor	Matt Ramsey
Co-Editor	Todd Shoeff
Final Approver	Jeremy Thamert
Lifecycle	Rough Draft
Effective Date	Pending Approval

Purpose

Establish the definitive command, editorial, revision, approval, system-boundary, and archival rules for the MH Ecosystem.

1. Historical lineage

The founder, Mike Holstien, issued the original manuals in 2011. Alex Linde owned the company and issued the 2019 Version 2 generation during 2019-2021. Mike Holstien resumed control in 2021 and hired Jeremy Thamert as General Manager in 2023. Jeremy Thamert purchased MHC in January 2025; Jeremy and Kim Thamert are the current owners, with Jeremy holding 51 percent to support Veteran-Owned status. Matt Ramsey is also a Navy veteran.

2. Version baseline

The Employee Handbook and MISH Manual retain Version 3.0 lineage during Rough Draft and Review. Every other Ecosystem document, manual, guide, form, TBT, and SDS card begins at Version 1.0. Movement from Rough Draft to Review does not change the version. After approval, revisions become 1.1 or 3.1 for minor changes; major-number changes require formal future authorization.

3. Editorial and approval gate

Every controlled document identifies Matt Ramsey as Author and Chief Editor, Todd Shoeff as Co-Editor, and Jeremy Thamert as Final Approver. Logical subject-matter reviewers are added by domain. CHENG and CHNAV complete editorial review; CEO determines that the Ecosystem may move from Rough Draft to Review. Final approval uses both signature and secure dashboard evidence.

4. Executive command

CEO holds final enterprise authority. COO directs CHENG and CHNAV. CHENG means Chief Engineer and controls Safety, Marketing, stakeholder-satisfaction oversight during construction, brand control, mhc-gc.com, and associated digital assets. CHNAV means Chief Navigation Officer and controls the separate Sales and Estimation Departments and most Preconstruction workflows.

5. Production release gate

Gate	Accountable Control
CHENG domain concurrence	Brand, website, safety, stakeholder, Marketing, and public-claim impacts
CHNAV domain concurrence	Sales, Estimation, Preconstruction, BidPilot, workflow, and usability
IT Specialist verification	Security, integrations, backups, testing evidence, deployment controls, and rollback readiness
COO executive concurrence	Operational fitness, resource impact, field usability, authority alignment, and implementation readiness
CEO final approval	Final enterprise approval, effective date, material policy, financial exposure, public risk, and unresolved objections

6. Records

Audit records remain active in dashboards for one year and are then archived permanently on the in-house server. Supervisors may not delete controlled records; corrections create a traceable entry. Safety, personnel, CDL, financial, incident, insurance, title, maintenance, and disposition records follow longer governing retention schedules.
