

CONTROLLED ENTERPRISE DOCUMENT

MH Branding Terminology Library

MH Construction, INC Enterprise Management System

Document family: STRATEGY AND BUSINESS DEVELOPMENT

Document title: MH Branding Terminology Library

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

MH Branding Terminology Library

Version 1.0 | Rough Draft | Website and Marketing Language Control

Control Role	Assigned
Author / Chief Editor	Matt Ramsey
Co-Editor	Todd Shoeff
Brand Owner / CHENG	Chief Engineer
Final Approver	Jeremy Thamert
Lifecycle	Draft
Effective Date	Pending Approval

1. Mission and Use

This library controls MH Construction, INC's hybrid military-construction language for mhc-gc.com, Marketing Flight, BidPilot proposal support, social media, email campaigns, events, recruitment, public-sector messaging, and branded collateral. It provides a consistent vocabulary without replacing legal, contractual, regulatory, safety, or technical terminology.

PUBLICATION CONTROL

Every proposed 'Word From the General' quotation in this library is draft copy written for Jeremy Thamert's review. No draft quotation may be attributed to Jeremy or published as his words until Jeremy approves the exact language. Approved text must be stored in Marketing Flight with the approval date and page assignment.

2. Brand Voice

Voice Attribute	Required Expression	Avoid
Direct	State the commitment, control, or next step plainly.	Hype, filler, vague superiority claims
Accountable	Connect authority to evidence and follow-through.	Promises without owner, process, or proof
Veteran-led	Express service, preparation, discipline, and responsibility.	Combat theater, aggression, domination, or costume language
Construction-grounded	Use scope, sequence, schedule, safety, quality, cost, and closeout correctly.	Military substitutions that confuse contract meaning
Relationship-first	Treat clients, trades, employees, and communities as partners.	Target, capture, infiltrate, enemy, conquest
Confident	Use short active statements supported by facts.	Best-in-class, unmatched, world-class without evidence

3. Primary Brand Lines

Level	Approved Line	Primary Use
Master	Built on Quality, Backed by Trust.	Homepage, corporate identity, pitch deck, major campaigns
Relationship	From Handshake to Handoff.	Client journey, project delivery, closeout
Execution	Squared Away from Start to Finish.	Services, field delivery, operations
Accountability	Your Word Is Your Bond. So Is Ours.	Leadership, client commitments, about page
Control	No Gaps. No Guesswork. Accountable Follow-Through.	BidPilot, Field Command Center, project controls
Detail	Professional on the Line. Thorough in the Details.	Services, estimating, trade partners
Safety	Every Team Member Returns Home Safe.	Safety, careers, orientation
Veteran	Service-Earned Discipline. Field-Proven Results.	Veterans, public sector, recruitment
Partnership	One Mission. One Team. One Accountable Build.	Client and trade-partner campaigns
Community	Build the Project. Strengthen the Community.	Events and outreach

4. Controlled Terminology

Term	Controlled Meaning	Use Boundary
Command Center	Primary home, leadership, or operational coordination point	Website homepage; internal dashboard
Operations Brief	Clear summary of scope, constraints, approach, and next steps	Services and project intake
Mission	Defined objective with success criteria	Campaign or project objective; never a substitute for contract scope
Mission Parameters	Scope, budget, schedule, risks, and constraints	Preconstruction and BidPilot
Mission-Ready	Verified prepared, qualified, resourced, and authorized	People, equipment, and handoffs
Deployment	Controlled mobilization of people or assets	Field mobilization; use standard term beside it on first reference
Command Loop	Documented feedback, escalation, decision, and closeout cycle	Internal operations and safety
Field Command Center	Internal job-aligned operations portal	Internal and authenticated pages
BidPilot	Sales, Estimating, and Preconstruction portal	Internal and approved recruiting/technology references
Marketing Flight	Marketing campaign and relationship portal	Internal and approved marketing references
Operational Theater	Active work area or jobsite	Internal safety language only; use jobsite publicly
Site Safety Commander	Qualified site-level safety authority	Internal MISH use; public copy uses Superintendent or safety leadership
Safety Command	Safety program and accountable leadership structure	Safety page and internal program
Mission Brief	Pre-task or daily safety and production briefing	Internal field use; explain publicly
After-Action Review	Structured lessons-learned review	Closeout and continuous improvement
Allied Network	Qualified trade-partner and supplier network	Trade partner page
Client Partner	Relationship term for a client or project owner	Marketing only; contracts retain Owner or Client
Trade Partner	Relationship term for subcontractors and suppliers	Marketing only; contracts retain legal party names
Field-Proven	Demonstrated through completed work or verified performance	Marketing only when evidence exists
Service-Earned Discipline	Veteran-led preparation, responsibility, and follow-through	Veteran, leadership, and culture messaging
Zero-Gap Accountability	Every required control has an owner and evidence	Internal governance; use sparingly in public copy

5. Construction and PMBOK Translation

Military-Brand Layer	Construction / Project-Control Anchor	Required Rule
Mission Intake	Initiating and opportunity intake	Do not replace formal solicitation or contract terminology
Operations Brief	Project brief, scope narrative, and execution approach	Identify assumptions and constraints
Mission Parameters	Scope, schedule, cost, quality, resources, and risk baselines	Baseline changes require change control
Deployment Plan	Mobilization and site-logistics plan	Include responsible parties and readiness criteria
Command Loop	Monitor, control, communicate, escalate, and close	Maintain decision and evidence trail
After-Action Review	Lessons learned and closeout review	Assign improvements to controlled documents or systems
Mission-Ready Handoff	Formal Preconstruction-to-Operations transfer	Requires acceptance criteria and accountable receiver

6. Phrase Bank

- Plan with purpose. Build with discipline. Close with accountability.
- Clear scope. Controlled sequence. Accountable delivery.
- Prepared before mobilization. Accountable through closeout.
- Field-ready planning for real-world construction.
- The mission is clear: safe work, quality execution, trusted relationships.
- Built for the field. Documented for the record. Delivered for the client.
- Decisions move faster when the facts stay visible.
- Strong handoffs build strong projects.
- Safety is command responsibility at every level.
- Earn the trust. Execute the work. Stand behind the result.
- Veteran-led discipline. Construction-grounded execution.
- Relationship builders. Number crunchers. Field executors. One accountable team.
- See the scope. Know the risk. Own the outcome.
- Ready on paper. Ready in the field.
- Close the loop before you call it complete.

7. Prohibited and Restricted Language

Do Not Use Publicly	Reason	Use Instead
Infiltrate, capture, conquer, dominate	Aggressive and inconsistent with community partnership	Engage, enter, build relationships, earn trust
Enemy, target, kill chain, weapons-grade	Combat framing creates reputational and legal risk	Competitor, audience, decision path, disciplined
Boots on the ground	Cliche and may minimize military service	Field team, site leadership, field presence
War room	Can sound theatrical outside emergencies	Command Center, coordination room, control meeting
Sub-Operator in contracts	Does not replace the legal subcontractor relationship	Subcontractor; Trade Partner in marketing
Guaranteed schedule or zero risk	Unverifiable absolute claim	Controlled schedule; risk-managed delivery
Best, safest, unmatched	Requires defensible comparative evidence	Verified performance statement with source

8. Website Page Language Matrix

Page	Page Line	Draft Word From the General
/	Built on Quality, Backed by Trust.	A project earns trust the same way a crew does: show up prepared, keep your word, and finish what you started.
/about	Your Word Is Your Bond. So Is Ours.	Our name is carried by every promise we make and every project we turn over. We protect both.
/about/details	The Standard Behind the Name.	The details matter because they reveal how a company thinks, prepares, and responds when the work gets difficult.
/accessibility	Access Is Part of Accountability.	Clear access to information is not an extra feature. It is part of respecting every person who needs to work with us.
/allies	One Mission. One Accountable Team.	The strongest projects come from trade partners who communicate early, solve problems directly, and stand behind their work.
/careers	Build Skill. Earn Trust. Lead Forward.	We are not filling seats. We are building a team of people who want responsibility, practice their craft, and help the next person succeed.
/careers/print	Know the Role. Own the Standard.	A position should be clear on paper before a person is asked to carry it in the field.
/contact	Start With a Direct Conversation.	Good projects start with a direct conversation. Tell us the mission, the constraints, and what success needs to look like.
/cool-desert-nights	Community Commitments Deserve a Record.	When we support an event, we document the outcome, thank the partners, and carry the lessons into the next mission.
/employee-handbook	Clear Standards. Consistent Treatment.	People perform better when expectations are written clearly, applied consistently, and backed by leaders who follow the same rules.
/events	Build the Project. Strengthen the Community.	Community is not a market to capture; it is a formation to stand beside, support, and strengthen.
/events/bbq-contest	Bring the Team. Feed the Community.	A good gathering brings people together around service, friendly competition, and the kind of relationships that last beyond the event.
/events/cool-desert-nights	Honor the Work Behind the Show.	Events succeed because volunteers, sponsors, crews, and community partners handle the details long before the gates open.
/events/ironman-volunteer	Service Shows Up Before Sunrise.	Volunteering means taking your post, supporting the mission, and helping every participant reach the finish safely.
/events/operation-cast-recover	Recovery Has a Team Formation.	When veterans and families need room

/events/:slug	Every Event Has Its Own Mission.	to reset, the community should be ready to stand beside them without hesitation. We support events with a clear purpose, an accountable plan, and respect for the people doing the work.
/faq	Direct Answers Before Commitments.	If a client has to guess, we have not communicated clearly enough. Ask the hard question early and get the facts on the table.
/faq/:category	Get the Right Answer From the Right Position.	Good decisions begin with accurate information, clear authority, and a direct path to the person responsible.
/jeremy-thamert	Ownership Means Accountability.	Ownership means the final responsibility stays with me. When we make a commitment, I expect our team to carry it through.
/locations	Regional Reach. Local Accountability.	Distance changes the logistics, not the standard. Every project receives clear leadership, direct communication, and accountable follow-through.
/locations/:city	Know the Ground. Respect the Community.	Every community has its own conditions, partners, and priorities. We prepare locally and carry one company standard everywhere.
/news	Report What Matters. Prove What We Claim.	We share what we learn because better information makes stronger clients, stronger partners, and stronger projects.
/offline	The Mission Continues When the Signal Drops.	Reliable systems plan for interruption, protect the record, and restore the team to current information as soon as connection returns.
/privacy	Trust Includes the Information We Hold.	If someone gives us information, we have a duty to protect it, limit its use, and be clear about why we need it.
/projects	Field-Proven Results.	The finished building matters, but so does the trail of decisions, craftsmanship, and accountability that got it there.
/projects/:slug	Every Build Has an After-Action Record.	A project story should show the challenge, the decisions, the fieldwork, and the result without overstating any part of the mission.
/public-sector	Public Work. Public Trust. Documented Accountability.	Public work demands disciplined records, transparent decisions, and a team that understands every dollar and every commitment belongs to the community.
/public-sector/tri-state-government-construction	Three States. One Accountable Standard.	Licensing may cross state lines, but our obligation stays constant: know the requirements, document the work, and protect the public trust.
/public-sector/veteran-led-compliance	Service-Earned Discipline. Audit-Ready Execution.	Compliance is not paperwork after the fact. It is a command responsibility built into planning, execution, and closeout.
/public-sector/veteran-led-construction	Veteran-Led. Mission-Ready. Publicly	Veteran leadership means bringing

	Accountable.	preparation, duty, and responsible stewardship to every public project we accept.
/qr-codes	One Scan. Current Information.	A barcode should connect the field to the right record quickly, accurately, and without creating another shadow system.
/resources	Clear Information Keeps Work Moving.	Information only works when the right person can find it, understand it, and act on it before the work is affected.
/resources/safety-manual	The Standard Must Be Available at the Point of Work.	A safety manual earns its place when the field can reach it, understand it, and use it before the task begins.
/resources/safety-manual/:cluster	Related Hazards Require One Coordinated View.	Safety controls work better when connected hazards, roles, and records are reviewed as one operating picture.
/resources/safety-manual/contents	Know the Standard Before You Need It.	A clear table of contents is a readiness tool: it gets the team to the right control before delay becomes exposure.
/resources/safety-manual/forms	If It Is Not Recorded, the Loop Is Not Closed.	Forms are not paperwork for its own sake. They prove the check occurred, the issue was assigned, and the corrective action was completed.
/resources/safety-manual/section/:slug	Every Control Has a Point of Work.	A written requirement matters only when the responsible person understands where, when, and how to apply it.
/resources/safety-program	Safety Is a System, Not a Slogan.	Strong safety performance comes from planning, training, field authority, accurate records, and correction before repetition.
/resources/terminology	Shared Language Builds Shared Understanding.	When the office and field use the same terms the same way, decisions move faster and accountability stays clear.
/safety	The Schedule Never Outranks Safety.	No milestone is worth sending someone home injured. We plan the work so safety, production, and quality move together.
/safety/incident-report	Report Fast. Preserve Facts. Correct the Cause.	An incident report is the start of corrective action, not the end of responsibility. Secure the scene, document the facts, and close the cause.
/safety/intake	Raise the Signal Before the Risk Grows.	We want concerns reported early. A small warning handled today can prevent a serious event tomorrow.
/safety/print/:id	The Field Copy Must Match the Controlled Record.	Printed safety information must be current, legible, and traceable to the approved source before it reaches the jobsite.
/services	Squared Away from Start to Finish.	Every service we offer has one purpose: give the client a clear plan, a capable team, and a build they can rely on.
/services/:slug	Define the Scope. Control the Sequence. Deliver the Result.	Specialized work succeeds when responsibilities, interfaces, constraints, and acceptance criteria are clear before

/sitemap	One Map to the Right Information.	field execution. A good system does not make people hunt for the next step. It shows the route and keeps the destination clear.
/team	Authority Follows Responsibility.	Titles establish responsibility. Character, competence, and follow-through earn the team's trust.
/terms	Clear Terms Protect Every Party.	Straight agreements reduce friction. We state the conditions clearly so expectations remain aligned from first contact through closeout.
/testimonials	Trust Reported From the Field.	A commendation belongs to the people who planned the work, solved the problems, and kept the promise when it mattered.
/veterans	Service Continues Through the Work.	Veteran-owned is not decoration. It means we carry service, preparation, and responsibility into the way we lead and build.
/veterans/public-sector-construction	Service Experience. Public Mission. Accountable Delivery.	The uniform may be retired, but the duty to prepare, serve, and remain accountable continues in the work we accept.

8.1 Dynamic Route Quote Banks

Dynamic routes must not repeat one quotation across every generated page. Marketing Flight selects a page-specific quotation from the applicable bank, edits it to the actual subject, obtains Jeremy's verbatim approval, and locks the approved route assignment.

Dynamic Route	Alternate Draft Quote
/events/:slug	The mission of this event is simple: support the people doing the work and leave the community stronger than we found it.
/events/:slug	A community event succeeds when preparation, volunteers, sponsors, and purpose stay aligned.
/events/:slug	We show up to contribute, not just to be seen. The work behind the event is what earns community trust.
/projects/:slug	This project required the team to understand the constraints early, communicate the changes, and protect the finished result.
/projects/:slug	The strongest proof of our standard is a completed project with a clear record and a client willing to call us again.
/projects/:slug	Every project tests the plan. Accountability is how the team adapts without losing control of safety, quality, cost, or schedule.
/services/:slug	This service depends on clear interfaces, qualified people, and disciplined follow-through at the point of work.
/services/:slug	Specialty work does not allow specialty excuses. Define the requirement, prepare the team, and verify the result.
/services/:slug	The more technical the scope, the more important it becomes to keep responsibilities and acceptance criteria visible.
/locations/:city	Local conditions change, but the obligation to prepare, communicate, and stand behind the work does not.
/locations/:city	We enter every community ready to listen first, coordinate locally, and deliver to one accountable company standard.
/locations/:city	Regional coverage only matters when local clients can still reach the people responsible for the work.
/faq/:category	The right answer should reduce uncertainty and make the next decision clearer.
/faq/:category	Questions are part of good planning. We would rather resolve an issue early than explain a preventable surprise later.
/resources/safety-manual/:cluster	Connected hazards require connected controls, clear authority, and one current operating picture.
/resources/safety-manual/section/:slug	Every safety requirement must identify the person, action, timing, evidence, and stop condition.
/safety/print/:id	A field copy carries authority only when it matches the current controlled source.

9. Quote Approval Workflow

1. Marketing drafts page-specific copy from this library.
2. CHENG verifies brand, page fit, factual accuracy, and reputational risk.
3. Jeremy Thamert approves the exact quotation and attribution.
4. Marketing Flight stores approved text, page, version, date, and approval evidence.
5. IT or the website publisher deploys through the controlled release gate.
6. CHENG verifies the live page and archive record.
7. Any wording change requires renewed Jeremy approval.

10. Website Findings and Repair Direction

The reviewed site uses a strong Command Center / Operations Brief / Comms Desk structure and already carries the master line Built on Quality, Backed by Trust. Multiple pages currently repeat the same generic Word From the General quotation. Replace repetition with the page matrix above after Jeremy approval. Standardize the heading as 'Word From the General' or 'Words From the General' across all pages; this library recommends the singular 'Word From the General' because each page contains one quotation.

Claims such as safety ratings, project counts, satisfaction, referral rates, certifications, affiliations, veteran status, licenses, and comparative performance require a current evidence record before publication. Brand language must never weaken contractual precision or regulatory meaning.
