MH Marketing Strategy Guide

MH Construction, INC Enterprise Management System

Document family: STRATEGY AND BUSINESS DEVELOPMENT

Document title: MH Marketing Strategy Guide

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

MH Construction, INC Marketing and Brand Guide

Brand authority, market strategy, proof and lead stewardship

Document ID: MKT-001 **Version:** 1.0 **Owner:** CHENG **Approver:** Jeremy Thamert, Owner/CEO
Status: Rough Draft - requires Marketing and executive review **Classification:** Internal - controlled
Effective date: Pending approval **Review cycle:** Annual and upon material change

This manual is an authoritative component of the MH Construction, INC Enterprise Management System. Employees follow this manual together with executed contracts, project-specific plans, jurisdiction addenda, manufacturer instructions and engineered requirements. Conflicts are stopped and escalated through the stated command path before work continues.

Brand and marketing controls

Combined guide authority

This document is MH Construction, INC's combined Marketing Guide and Brand Standards Guide. It is the authority for company identity, marketing operations, public claims, campaigns and approved brand assets. Unregistered or superseded copies are not authoritative.

Approved visual system

Headings use Mendl Sans Dusk Bold, subheadings use Mendl Sans Dusk Medium and body copy uses Mendl Sans Dusk Regular. The official 2026 style guide establishes Hunter Green #386851 and Leather Tan #BD9264 as the primary identity colors, with White #FFFFFF and Black #000000 as the neutral base. Sage #628F79, Warm Sand #D9BD93 and Charcoal #0F1412 are supporting interface colors only. The official MH Construction, INC logo is the source asset 0_mh-logo.png; only its controlled repository copy may be published. Maintain clear space around the mark, do not recolor or distort it, and use the dark-background variant only where it preserves contrast.

Website authority

<https://mhc-gc.com> is the canonical public website. Public materials must use this exact domain, the approved website service descriptions, and approved contact channels. A landing page, social profile, QR code, advertisement, email signature or document footer may not direct users to an unapproved domain or an unpublished development environment.

Claims substantiation

Claims about safety, certifications, licenses, project performance, bonding, capacity, veteran ownership or self-perform work require current evidence in the claim register. Every claim has an owner, source, review trigger, approved channels and approver.

Approval workflow

Project facts are verified by the PM; client names/testimonials and photography follow documented consent; safety/regulatory language receives Safety review; legal or comparative claims receive qualified review; final publication approval follows the authority matrix.

Operating procedures

MG-01.0 | Canonical Strategy Sources

The following sources govern all marketing decisions. When cadence, proof, lifecycle, or handoff rules change in the parameters directory, both the Marketing Strategy Guide and the Sales/Estimating Guide must be updated in the same change cycle.

Source	What It Controls	Use It For
Service Routes (website/src/lib/data)	Canonical project marketing service summary	Public service copy and route-level strategy framing
Social Media Branding Parameters	Shared campaign parameters baseline for marketing and sales congruency	Approved tone, cadence, proof rules, lifecycle naming, and content-length decisions
Lifecycle Campaign Parameters	Shared phase naming and timing baseline	Keeping project-phase language, slogans, and timing consistent across campaign planning and recap work
Proof and Approval Parameters	Shared evidence and release baseline	Deciding what can be published, when to hold content, and how approval discipline is applied
Google Business Profile Optimization Guide	GBP operating workflow and optimization discipline	Managing posting rhythm, profile upkeep, review handling, and local-search execution
GBP Post Templates	Google Business Profile execution templates	Applying approved local-post structure, service-area wording, and relationship-first GBP messaging
Media Strategy & Photo/Video Roadmap	Photo/video roadmap and repurposing structure	Asset planning, capture lists, and visual proof workflow
Website Layout Enhancement Plan	Original strategy planning source	Historical intent, layout assumptions, and narrative direction
Marketing Flight	Lead tracking, pipeline visibility, and follow-up automation	Logging inbound leads, tracking campaign attribution, and managing stakeholder follow-up sequences

MG-02.0 | Core Doctrine and Operating Model

Marketing at MH Construction, INC is not simply posting photos. It is a marketing operations system designed to support lead generation, protect stakeholder trust, and carry the project story from preconstruction through handoff. The operating model is grounded in the four-value professional foundation system:

Honesty: communicate what is true, current, and approved.

Integrity: do not manipulate outcomes, timelines, or completion status.

Professionalism: present the project team, trade coordination, and Client Partner experience with discipline and respect.

Thoroughness: capture the full project story from ground break through closeout and legacy content.

These values build toward the MH end state: trust. Brand language must remain consistent with the approved MH primary slogan: "Built on Quality, Backed by Trust." Supporting copy should favor clear scope, accountable delivery, dependable follow-through, and relationship continuity over hype.

MG-03.0 | The Marketing Operations Stack

The CHENG (Chief Engineer - website/dashboard developer and overseer) leads the Marketing Department. The Marketing Commander, reporting directly to the CHENG, manages approved marketing execution and implements the daily marketing strategy.

MH Construction, INC uses a multi-channel media distribution stack so every project update has a clear job: build visibility, reinforce proof, or deepen trusted relationships. Each channel should publish only what it can support well. The goal is not volume - it is clear, evidence-backed communication that reinforces MH as a trusted construction partner.

Channel	Primary Job	Content Type	Approval Authority
Radio Ads / Commercials	Market awareness, top-of-funnel brand recognition	Produced spots, seasonal campaigns	CEO / CHENG (COO review >\$1k)
YouTube	Long-form proof assets (1x/month)	Walkthroughs, interviews, project recaps	CHENG
Website	Central hub for trust content and SEO (Weekly updates)	Case studies, project storytelling, service pages	CHENG
LinkedIn	B2B authority, owner-facing updates (2x/week)	Professional proof, milestone announcements	CHENG
Facebook	Community visibility, culture (3x/week)	Trade Partner recognition, community milestones	Marketing Team / CHENG
Google Business Profile	Local search visibility (1x/week per location)	Project updates, review responses, service-area posts	Marketing Team
Instagram / X	Visual proof, short updates (3x/week)	Milestone amplification when approved	Marketing Team
Email Blasts	Direct stakeholder communication (1x/month)	Referral network updates, long-tail follow-up	CHENG
Marketing Flight	Lead tracking, pipeline, follow-up automation (Daily)	Automated sequences, lead records, attribution data	CHENG / CHNAV

MG-04.0 | Three Content Pillars

Every piece of marketing collateral must align with one of three pillars so the message stays consistent across channels and project phases.

Pillar 1: Service-Earned Discipline

Focus on the people, field standards, and disciplined delivery culture behind the work. Use service-earned language that reflects professionalism, safety, and field credibility without sounding promotional.

Pillar 2: Force Multiplier

Show the technology, integration, and operational efficiency behind the work. This includes spatial capture, digital twins, site documentation, and the systems that support clear coordination, clear handoffs, and zero-gap accountability.

Pillar 3: Handshake Pride

Highlight the stakeholder network and relationship quality behind the build. This includes Client Partners, architects, city officials, Trade Partners, veterans, and other community stakeholders who define the project story and contribute to long-term trust.

MG-05.0 | The Four-Phase Project Lifecycle Campaign

Each phase uses a plain-language construction description, a branded slogan line, and a proof standard tied to how MH wants the work to be seen in the field and remembered after handoff. The canonical phase names, week ranges, and slogan lines live in the Lifecycle Campaign Parameters.

Phase I: Deployment - Weeks 1-8: Ground Break and Earthwork

Slogan: BREAK GROUND, NOT THE SCHEDULE.

Record site prep, initial trenching, and foundation pours. The PM and Superintendent clear drone flights and safe site access so the early record stays accurate, approved, and usable across channels.

Phase II: Active Tempo - Weeks 9-24: Vertical Build and MEP Rough-In

Slogan: RAISE THE PACE, NOT THE PRESSURE.

Document structural framing, Trade Partner execution, and the active safety posture on site. Align camera crews with major material deliveries and structural milestones so public updates match the most visible progress points.

Phase III: Closing - Weeks 25-32: Finishes and Ribbon Cutting

Slogan: CUT THE RIBBON, NOT THE CORD.

Capture architectural details, final walkthroughs, and stakeholder handoffs. The PM clears final staging areas to ensure the closeout asset set is clean, professional, and ready for long-tail case-study use while reinforcing that the relationship continues after project completion.

Phase IV: Legacy - Weeks 33-36: Project Debrief and Podcast

Slogan: FINISH THE PROJECT, NOT THE PARTNERSHIP.

Execute executive interviews, review cost variances, and publish case studies. The CEO and command team schedule studio recording sessions so the completed project produces durable thought-leadership and referral material after handoff.

Podcast and Legacy Content Production Workflow

Phase IV legacy content requires a defined production path. The CHENG coordinates with the CEO to schedule the studio session within 30 days of project closeout. The session agenda covers: project overview and scope summary, key milestones and challenges, stakeholder recognition, and lessons learned. Raw recordings are reviewed by the CEO before publication. Published assets are logged in the project case-study record in Procore and distributed via YouTube, LinkedIn, and the website.

MG-06.0 | Content Standards and Proof Rules

These standards protect message quality across every project phase and channel. If a post, recap, or case-study element does not meet these baselines, it must be revised or held.

Section 6.1: Channel Baseline

Primary channels: LinkedIn and Facebook.

Secondary channels: YouTube, Google Business Profile, Instagram, X, reviews, newsletters, and website case-study surfaces when approved.

Keep visual identity, naming, and trust framing consistent across channels.

Match the channel to the message: stakeholder proof on LinkedIn, community-facing visibility on Facebook, local trust visibility on GBP, and deeper evergreen assets on the website and YouTube.

Section 6.2: Cadence Baseline

Default pace: one to two posts per week.

Prefer one proof-driven update and one supporting technical or trust post when the project has enough approved material.

Reduce cadence when approvals, privacy, or project sensitivity require a slower release rhythm.

Increase cadence only when verified milestones, media quality, and owner sensitivity all support it.

Section 6.3: Copy Baseline

Lead with construction delivery language first.

Keep veteran field standards as credibility support, not as hype.

Use plain-language, evidence-backed statements.

Avoid speculative completion claims, internal assumptions, and unverified performance language.

Prefer wording that reinforces clear scope, accountable delivery, dependable follow-through, and mission-ready handoff.

Section 6.4: Proof Baseline

Only publish updates tied to actual milestones and approved facts.

Prefer completed-scope photos, approved milestone notes, verified outcomes, and stakeholder-approved summaries.

Treat privacy, controlled access, and active-jobsite boundaries as mandatory.

When in doubt, choose the lower-risk proof set and wait for better approved evidence.

Section 6.5: Photo and Video Approval

Per the Employee Handbook (HB 04), no team member may post photos or videos of active job sites, Client Partner properties, or proprietary construction methods without prior written approval from the COO or CEO. The CHENG coordinates this approval before any field media is released to any channel. The PM is responsible for clearing drone flights and safe site access for media capture - this is a field safety and privacy clearance, not a content approval. Final content approval authority remains with the CHENG and CEO.

Section 6.6: Client Testimonial Capture

Client testimonials are a high-value proof asset. The PM initiates the testimonial request at Phase III closeout using the approved Photo and Media Release Form. The CHENG reviews the testimonial for accuracy and tone before publication. Testimonials must not be edited in a way that changes the Client Partner's intended meaning. All testimonials are logged in the project case-study record in Procore.

Section 6.7: Email List Governance

All email blast lists are managed in Marketing Flight. Contacts must have opted in or have a pre-existing business relationship with MH Construction, INC. Unsubscribe requests must be honored within 10 business days. The CHENG is responsible for list hygiene and CAN-SPAM compliance. No personal email lists or external list vendors may be used without CEO approval.

MG-07.0 | Guardrails

Keep language relationship-first, construction-first, and factual.

Preserve trust and accreditation signals where relevant.

Use the approved MH primary slogan when a slogan is required, and keep supporting lines aligned with it.

Do not claim outcomes that cannot be supported by evidence.

Apply public-sector sensitivity controls when the project touches government or grant-funded work.

Align page titles, section labels, and descriptors with canonical MH naming rules.

Avoid internal jargon, hype phrasing, and militarized language that reduces clarity for owner and community audiences.

Do not release any content that identifies active jobsite access points, security measures, or proprietary construction sequencing.

Do not use AI-generated images of MH projects or personnel without CEO approval.

MG-08.0 | Success Measures and Reporting

Track the strategy at four levels so performance is measured on consistency, proof, and relationship value, not just output volume. The CHENG reports these metrics to the CEO monthly.

Measure	What Good Looks Like	Reporting Cadence	Owner
Cadence	100% adherence to weekly posting schedule across all active platforms	Weekly self-check; monthly CEO report	CHENG
Proof quality	Zero unverified claims; all public posts backed by project evidence	Per-post review before publish	CHENG
Brand congruency	Zero deviations from Dual Terminology Standard and Brand Constants	Monthly audit	CHENG
Conversion value	Minimum 2% lead conversion rate from inbound digital traffic	Monthly (Marketing Flight data)	CHENG / CHNAV
GBP local rank	Maintain top 3 ranking for 'general contractor Pasco' and primary keywords	Monthly (GBP Insights)	Marketing Team
Website traffic	5% month-over-month organic traffic growth; >500 unique visitors/mo	Monthly (Google Analytics)	CHENG
Email engagement	Open rate consistently above 20%; unsubscribe rate below 1.0%	Per campaign (High-Level)	CHENG
Lead attribution	95%+ of inbound leads accurately tagged by source channel in CRM	Monthly pipeline review	CHENG / CHNAV

MG-09.0 | CRM and Lead Attribution

Marketing Flight is the system of record for all inbound leads, client relationships, and marketing-driven pipeline activity. Every inbound inquiry - regardless of channel - must be logged in High-Level within one business day of receipt.

Section 9.1: Lead Source Tagging

All leads must be tagged with their originating source channel at the time of entry. Approved source tags are: Website Contact Form, Google Business Profile, LinkedIn, Facebook, Referral (name the referrer), Radio, Email Campaign, Phone (direct), and Other (describe). This data feeds the monthly conversion value metric in MG 08.

Section 9.2: Marketing-to-Sales Handoff

When a marketing-originated lead reaches the qualification threshold (Client Partner has expressed intent to discuss a specific project), the CHENG notifies the CHNAV within one business day and tags the lead as 'Sales Ready' in High-Level. At that exact transition point, the CHNAV assumes full and exclusive control of the pursuit tracking to prevent data duplication. The CHENG retains read-only visibility in High-Level to track whether the lead converts and to attribute the channel correctly.

Section 9.3: Post-Award Marketing Trigger

Upon contract award, the CHNAV notifies the CHENG within two business days. The CHENG initiates the Phase I (Deployment) campaign within five business days of the award notification. The project is added to the active campaign register, and the milestone capture plan is drafted in coordination with the PM.

DIRECTIVE: MG-10-DIR-01: Authority Scope. The CHENG (Chief Engineer / Director of Digital Operations) holds unilateral content and spend approval authority for marketing initiatives up to \$1,000. Any spend or campaign commitment between \$1,000 and \$2,500 requires secondary review and approval by the Chief Operating Officer (COO). Spend exceeding \$2,500 requires CEO approval.

MG-10.0 | Budget and Spend Governance

Marketing spend is a controlled operational expense. All marketing expenditures must be pre-approved and tracked against the annual marketing budget established by the CEO during the annual planning cycle.

Section 10.1: Approval Thresholds

Spend Amount	Required Approval
Under \$1,000 (single item)	CHENG unilateral approval; log in Sage 100
\$1,000 to \$2,500	CHENG approval + COO review and approval
\$2,500 to \$10,000	CEO approval required before commitment
Over \$10,000	CEO approval + board/owner review if applicable
Radio / broadcast contracts (any amount)	CEO approval required

Section 10.2: Vendor and Platform Contracts

All recurring platform subscriptions (High-Level, scheduling tools, analytics tools) must be reviewed annually by the CHENG and approved by the CEO. New vendor contracts must be reviewed for data privacy terms before execution. No marketing vendor may have access to Client Partner data without a signed NDA and CEO approval.

Section 10.3: Cost Code Integration

Marketing expenses are coded in Sage 100 under the approved marketing cost code structure. Project-specific marketing costs (photography, video production, signage) are coded to the project. General brand and channel costs are coded to the overhead marketing budget. The CHENG reconciles the marketing budget with the COO quarterly.

MG-11.0 | Inbound Lead Handoff to Sales

This section defines the reverse handoff - from marketing-generated awareness to a qualified sales pursuit. It closes the loop between MG 09 (CRM and Lead Attribution) and SE 04.1 (Opportunity Qualification) in the Sales/Estimating Guide.

Section 11.1: Qualification Threshold

A marketing lead reaches the handoff threshold when the Client Partner has: (1) identified a specific project or scope, (2) confirmed a decision timeline, and (3) expressed willingness to engage MH Construction, INC directly. Leads that do not meet all three criteria remain in the marketing nurture track in High-Level.

Section 11.2: Handoff Protocol

CHENG creates a handoff summary in High-Level, including: lead source, contact history, project description, and any known budget or timeline signals.

CHENG notifies CHNAV via direct message and tags the lead as 'Sales Ready' in High-Level.

CHNAV acknowledges within one business day and initiates SE 04.1.

CHENG remains on the lead record as the originating contact for attribution tracking.

Section 11.3: Feedback Loop

The CHNAV notifies the CHENG of the outcome of every handed-off lead (won, lost, or no-bid) within five business days of the decision. This data is used to refine channel investment decisions and campaign targeting in the next planning cycle.

MG-12.0 | Mobilization / Project Start and Review

Before publishing a new project marketing run, confirm the following so the campaign stays aligned with MH brand standards and field reality:

1. The project has an approved milestone list and media capture plan.
2. The weekly cadence matches the current delivery phase and sensitivity level.
3. All public copy is evidence-backed and relationship-first.
4. The primary slogan, trust language, and naming stay aligned with MH brand standards.
5. Client Partner approval has been obtained for any content that identifies the project, property, or personnel.
6. The lead is logged in High-Level and the source channel is tagged.
7. The guide output is regenerated after material changes to sections, labels, or strategy sources.

BRANDING TERMINOLOGY LIBRARY INTEGRATION | 2026-08-04

The MH Branding Terminology Library v1.0 Draft controls public military-construction terminology, slogans, tag lines, page labels, phrase boundaries, and proposed Word From the General quotations. Marketing Flight must store quotation approval evidence before publication. Contract, regulatory, safety, and technical terms retain their governing meanings.
