

CONTROLLED ENTERPRISE DOCUMENT

MH Financial Controls Guide

MH Construction, INC Enterprise Management System

Document family: PROJECT DELIVERY

Document title: MH Financial Controls Guide

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

MH Construction, INC Financial and Commercial Controls Manual

Controlled functional standard and operating evidence

Document ID: FIN-001 **Version:** 1.0 **Owner:** CFO/Finance **Lead Approver:** Jeremy Thamert, **Owner/CEO Status:** Rough Draft - functional, technical and field review required **Classification:** Internal - controlled **System of record:** Accounting and project repository **Review cycle:** Annual and upon material change

This standard follows the original MH Ecosystem document-family architecture. It operates with the Enterprise Management System, the approved project requirements, applicable law, engineered design, manufacturer instructions and executed contracts. When requirements conflict, stop the affected work or decision and escalate it.

1. Purpose and authority

This manual establishes the accountable process, required evidence and release conditions for financial and commercial controls manual. It does not authorize a departure from a contract, law, technical instruction or safety requirement. The owner assigns trained delegates but retains accountability for process performance and evidence quality.

2. Required controls

No.	Required control
1	Budget baseline, job-cost and commitment control
2	AP/AR, payment evidence, waiver control and fraud verification
3	Monthly close, WIP, forecast and cash management

3. Operating workflow

1. Lock the approved budget before project cost is incurred.
2. Separate preparation, approval, receipt and payment duties.
3. Complete FIN-FORM-WIP-001 monthly and assign every reconciling exception.

4. Evidence and records

The following records prove execution. Each record must identify project, employee, asset, vendor or transaction reference; preparer; date/time; reviewer; disposition; system-of-record location; and closure evidence where applicable.

- Budget baseline record
- FIN-FORM-WIP-001
- Payment and waiver record

5. Exceptions, escalation and assurance

An exception requires written scope, reason, risk, compensating control, owner, approval authority, expiration and evidence location. Material failures, overdue actions, repeat events, suspected fraud, safety risks, quality failures, cyber events or contract exposures escalate immediately to the accountable owner and executive leadership. The owner reviews operating evidence at the required management cadence and initiates a controlled revision when the process, source requirements or organization changes.
