MH Warehouse Management System Standard

MH Construction, INC Enterprise Management System

Document family: SAFETY AND FIELD OPERATIONS

Document title: MH Warehouse Management System Standard

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

Warehouse Management System and Barcode Standard

Version 1.0 | Rough Draft | Effective date pending approval

Control Role	Assigned
Author / Chief Editor	Matt Ramsey
Co-Editor	Todd Shoeff
Final Approver	Jeremy Thamert
Lifecycle	Draft
Effective Date	Pending Approval

Purpose

Establish an in-house WMS module within the Field Command Center for tools, equipment, safety gear, rentals, consumables, availability, custody, and lifecycle control.

1. Ownership

Warehouse Manager owns tool, inventory, and safety-gear data. Fleet Commander owns fleet and equipment data. Safety defines reusable safety-equipment inspection and retirement criteria. Accounting verifies financial onboarding and disposition. IT owns system integrity but not operational facts.

2. Identification

Use QR and Code 128 labels with RFID-ready architecture. Individually tag every vehicle, trailer, heavy-equipment unit, attachment, generator, rental, serialized powered tool, battery, charger, calibrated instrument, reusable safety device, and hand tool valued at \$100 or more. Lower-value tools use kits, gang boxes, or quantity controls.

3. Transactions

Company iPhones and iPads scan employee ID, device, date-time, project or location, transaction, condition, and evidence. Offline transactions synchronize later. Location is captured at transaction, not through continuous employee tracking.

4. Availability

Status	Control
Available	Released for reservation or issue
Reserved	Held for approved future use
Assigned	Custody accepted
In Transit	Movement recorded
Maintenance Hold	Unavailable pending service
Out of Service	Safety or compliance hold
Lost	Investigation exhausted and classification approved
Retired	Removed from service, disposition pending
Disposed	Lifecycle closed; history retained

5. Inventory control

Perform monthly cycle counts and one annual full inventory. High-value, calibrated, and safety-critical items receive risk-based counts. Missing assets open an investigation and become Lost after ten days unless COO extends the period. Records are corrected, never deleted.

6. Safety gear

Expired, failed, impact-loaded, contaminated, or recalled safety gear enters Do Not Issue status. Safety authorizes release or disposal; Warehouse controls issue, return, storage, and availability.
