

CONTROLLED ENTERPRISE DOCUMENT

MH Field Command Center System Standard

MH Construction, INC Enterprise Management System

Document family: IT AND INFRASTRUCTURE

Document title: MH Field Command Center System Standard

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

Field Command Center System Standard

Version 1.0 | Rough Draft | Effective date pending approval

Control Role	Assigned
Author / Chief Editor	Matt Ramsey
Co-Editor	Todd Shoeff
Final Approver	Jeremy Thamert
Lifecycle	Draft
Effective Date	Pending Approval

Purpose

Govern the in-house operational dashboard and its fleet, WMS, qualification, project, maintenance, and controlled-record modules.

1. Ownership

COO is operational owner. Fleet Commander owns fleet data quality. Warehouse Manager owns WMS data quality. CHNAV leads workflow design. CHENG governs brand, website, safety, stakeholder, and technical-asset impacts. IT administers configuration, accounts, cybersecurity, backups, devices, integrations, uptime, and deployment.

2. Release control

CHENG and CHNAV must agree, IT must verify testing and rollback readiness, and COO grants final production approval. Unresolved safety, security, legal, or material enterprise objections escalate to CEO. Emergency changes receive review within 24 hours.

3. Operational authority

IT cannot change availability, qualification, maintenance holds, assignments, or return-to-service decisions. Fleet Commander controls administrative repair release; Chief Superintendent completes the final operational check after safety-critical repairs. Routine preventive maintenance may be released by Fleet Commander.

4. Communication

Safety-critical holds generate dashboard, email, and SMS notices. Downtime records show asset, location, defect, safety status, forecast, replacement plan, owner, vendor, and next update. Fleet Commander updates open downtime before Monday 9:00 a.m. meetings and every-other-Thursday Superintendent meetings, and immediately when forecasts change.

5. Transfer discipline

Chief Superintendent may redirect equipment immediately for production, but must record the dashboard transfer immediately and email affected parties. Failure to communicate within 24 hours triggers progressive corrective action through COO.

6. Audit and privacy

The system maintains immutable audit history. Public status is limited to Qualified and Current or Not Current; authorized supervisors see deficiencies and employees see their own details. Audit logs remain active for one year and then archive permanently to the server.
