TBT-01.16: Heat Illness Prevention & Hydration

CSI Division: Div 01 | Track Assignment: Track 4 Universal

DIRECTIVE

When temperatures exceed 80°F, mandatory heat illness prevention protocols take effect. Hydration and shade breaks are non-negotiable.

GENERAL ORDER

Water must be provided at all times (1 quart per worker per hour). Workers must monitor themselves and their partners for signs of heat exhaustion.

Key Hazards & Mitigation (The 'What If')

- Worker stops sweating and becomes confused — this is heat stroke, call 911 immediately, begin active cooling.
- Running out of water at the gang box — stop work until the water station is restocked.
- Working in full sun on the roof — mandate 5-minute shade breaks every hour.

FIELD INSTRUCTION

Foreman: Verify the water coolers are full and shaded rest areas are established before the shift begins.

Toolbox Talk Documentation & Sign-Off

This Toolbox Talk (TBT) is a mandatory component of the MH Construction, INC Industrial Safety & Health (MISH) Program. All site personnel, including subcontractors and temporary laborers, must attend this briefing before commencing related work activities.

The Site Safety Commander or designated Foreman is responsible for delivering this content, ensuring comprehension, and documenting attendance. Failure to adhere to the safety protocols outlined herein may result in disciplinary action up to and including removal from the jobsite.

By signing the daily attendance log (Form MISH-F-10.1), you acknowledge that you have received, understood, and agree to comply with the safety directives presented in this Toolbox Talk.
