TBT-02.01 | Demolition And Structural Stability

MH Construction, INC Enterprise Management System

Document family: TOOLBOX TALK LIBRARY

Document title: TBT-02.01 | Demolition And Structural Stability

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-02.01: Demolition & Structural Stability

CSI Division: Div 02 | Track Assignment: Track 1 Civil & Earthwork

DIRECTIVE

All demolition activities must be preceded by an engineering survey to determine the condition of the framing, floors, and walls to prevent unplanned collapse.

GENERAL ORDER

The Competent Person must continuously monitor the structure during demo. If any load-bearing element shifts unexpectedly, stop work and evacuate the zone immediately.

Key Hazards & Mitigation (The 'What If')

- Load-bearing wall cut too early — evacuate zone, call structural engineer.
- Dust levels exceed limits — deploy water suppression and N95 respirators.
- Unmarked pipe breached — stop work, treat as live/hazardous until verified.

FIELD INSTRUCTION

Foreman: Verify the engineering survey is signed and in the site binder before the first hammer swings.

Attendance Roster (MISH-F-10.1)

Toolbox Talk Documentation & Sign-Off
This Toolbox Talk (TBT) is a mandatory component of the MH Construction, INC Industrial Safety & Health (MISH) Program. All site personnel, including subcontractors and temporary laborers, must attend this briefing before commencing related work activities.

The Site Safety Commander or designated Foreman is responsible for delivering this content, ensuring comprehension, and documenting attendance. Failure to adhere to the safety protocols outlined herein may result in disciplinary action up to and including removal from the jobsite.

By signing the daily attendance log (Form MISH-F-10.1), you acknowledge that you have received, understood, and agree to comply with the safety directives presented in this Toolbox Talk.
