Document family: TOOLBOX TALK LIBRARY

Document title: TBT-06.01 | Rough Carpentry And Pneumatic Tools

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-06.01: Rough Carpentry & Pneumatic Tools

CSI Division: Div 06 | Track Assignment: Track 2 Structural & Steel

DIRECTIVE

Pneumatic nail guns must have a safety device on the muzzle to prevent the tool from ejecting fasteners unless the muzzle is in contact with the work surface.

GENERAL ORDER

Never bypass or tape down the safety nose contact. Disconnect the air hose before clearing a jam or performing maintenance.

Key Hazards & Mitigation (The 'What If')

- Nail gun double-fires — disconnect air, inspect safety mechanism.
- Worker holding wood behind the nailing surface — reposition hands, use clamps.
- Hose trips worker on framing deck — route hoses safely, use hose hooks.

FIELD INSTRUCTION

Foreman: Inspect all pneumatic tools for bypassed safeties before use. Confiscate altered tools immediately.
