TBT-09.02: Drywall Dust & Stilts Safety

CSI Division: Div 09 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Stilts may only be used on clean, flat surfaces free of debris. Drywall sanding requires respiratory protection and dust containment.

GENERAL ORDER

Never walk on stairs or use ladders while wearing stilts. Keep the floor swept continuously during stilt work.

Key Hazards & Mitigation (The 'What If')

- Worker on stilts steps on a screw — sweep floors constantly, maintain a clean deck.
- Sanding dust spreads to other areas — use plastic barriers and HEPA vacuums.
- Worker tries to pick up dropped tool while on stilts — ask a coworker, do not bend over.

FIELD INSTRUCTION

Foreman: Inspect the floor for debris and trip hazards before any worker mounts stilts.
