Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-10.01: Installation of Heavy Specialties (Lockers/Partitions)

CSI Division: Div 10 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Heavy specialty items must be securely anchored to structural members, not just drywall, to prevent tip-over hazards.

GENERAL ORDER

Use the correct anchors for the substrate (concrete, steel, wood). Two-person lift required for any specialty item over 50 lbs.

Key Hazards & Mitigation (The 'What If')

- Locker bank tips forward during install — clear the area, use temporary wall braces.
- Drilling into wall hits resistance — stop, check for conduit or pipes.
- Awkward lift in tight bathroom — use material lift or extra personnel.

FIELD INSTRUCTION

Foreman: Verify the anchor specifications match the substrate before installation begins.
