Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-11.06: Commercial Kitchen Equipment Rigging

CSI Division: Div 11 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Heavy commercial kitchen hoods and ovens must be moved using mechanical dollies or pallet jacks, never manually dragged.

GENERAL ORDER

Coordinate with plumbers and electricians before setting the equipment to ensure rough-ins are not crushed.

Key Hazards & Mitigation (The 'What If')

- Hood swings while being hoisted — use tag lines, do not grab the hood directly.
- Oven crushes a floor drain pipe — verify all floor penetrations are protected before moving equipment.
- Worker strains back pushing a fridge — use a mechanical jack or add personnel.

FIELD INSTRUCTION

Foreman: Conduct a dry run of the move path to ensure clearance and floor protection before moving the equipment.
