Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-01.18: Casework & Cabinetry Installation

CSI Division: Div 12 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Casework must be leveled, shimmed, and secured to wall studs to ensure stability and load-bearing capacity.

GENERAL ORDER

Use proper lifting techniques for heavy cabinets. Keep fingers clear of pinch points when mating cabinet boxes together.

Key Hazards & Mitigation (The 'What If')

- Cabinet slips off ledger board — let it fall, do not try to catch it.
- Using table saw for filler pieces — ensure blade guard and push stick are used.
- Chemical smell from adhesives — ensure adequate ventilation, check SDS.

FIELD INSTRUCTION

Foreman: Ensure two workers are assigned to all upper cabinet installations.
