TBT-13.01 | Pre Engineered Metal Buildings Pemb

MH Construction, INC Enterprise Management System

Document family: TOOLBOX TALK LIBRARY

Document title: TBT-13.01 | Pre Engineered Metal Buildings Pemb

Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-13.01: Pre-Engineered Metal Buildings (PEMB)

CSI Division: Div 13 | Track Assignment: Track 2 Structural & Steel

DIRECTIVE

PEMB erection requires a site-specific erection plan. No workers are permitted under a suspended load during frame assembly.

GENERAL ORDER

Use 100% tie-off when working at heights during purlin and girt installation. Ensure base plates are grouted and cured before loading the structure.

Key Hazards & Mitigation (The 'What If')

- Wind gust catches a roof panel during lift — tag lines must be used to control the load.
- Worker walking the purlins without tie-off — stop work, enforce 100% tie-off.
- Anchor bolt doesn't align — do not force or cut it without engineering approval.

FIELD INSTRUCTION

Foreman: Review the site-specific erection plan and verify wind conditions before lifting frames.

Toolbox Talk Documentation & Sign-Off
This Toolbox Talk (TBT) is a mandatory component of the MH Construction, INC Industrial Safety & Health (MISH) Program. All site personnel, including subcontractors and temporary laborers, must attend this briefing before commencing related work activities.

The Site Safety Commander or designated Foreman is responsible for delivering this content, ensuring comprehension, and documenting attendance. Failure to adhere to the safety protocols outlined herein may result in disciplinary action up to and including removal from the jobsite.

By signing the daily attendance log (Form MISH-F-10.1), you acknowledge that you have received, understood, and agree to comply with the safety directives presented in this Toolbox Talk.
