## TBT-22.03: Soldering & Brazing Fire Watch

CSI Division: Div 22 | Track Assignment: Track 3 MEP & Interior

### DIRECTIVE

A dedicated fire watch must be maintained during and for 30 minutes after any soldering or brazing operations in combustible areas.

### GENERAL ORDER

Use heat shields to protect adjacent wood framing. Keep a fire extinguisher within arm's reach of the torch operator.

### Key Hazards & Mitigation (The 'What If')

- Torch flame hits wood stud — use heat shield, spray with water immediately.
- Worker leaves area right after soldering — fire watch must remain for 30 minutes.
- Acetylene cylinder falls over — secure all cylinders upright in carts or to structure.

### FIELD INSTRUCTION

**Foreman: Assign a dedicated fire watch and verify the 30-minute post-work cooldown period.**

### Attendance Roster (MISH-F-10.1)

| Print Name | Signature | Date |
|------------|-----------|------|
|            |           |      |
|            |           |      |
|            |           |      |
|            |           |      |
