Version: 1.0 | Lifecycle: Rough Draft

Use only after required functional, technical, field-usability, and approval gates are complete.

Control: Version 1.0 | Status Rough Draft | Author and Chief Editor: Matt Ramsey | Co-Editor: Todd Shoeff | Final Approver: Jeremy Thamert

TBT-23.02: Ductwork Hoisting & Overhead Assembly

CSI Division: Div 23 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Large duct sections must be hoisted using mechanical lifts, not manual lifting from ladders. Secure all duct sections before releasing the lift.

GENERAL ORDER

Beware of sharp sheet metal edges. Wear cut-resistant gloves during all duct assembly and handling.

Key Hazards & Mitigation (The 'What If')

- Worker cuts hand on duct edge — wear Kevlar/cut-resistant gloves.
- Duct section falls from lift — secure duct to the lift forks before raising.
- Working above drop ceiling grid — beware of sharp grid edges and poor lighting.

FIELD INSTRUCTION

Foreman: Verify that all duct lifts are rated for the weight of the assembly before hoisting.
