TBT-27.01: Cable Tray & Data Line Pulling

CSI Division: Div 27 | Track Assignment: Track 3 MEP & Interior

DIRECTIVE

Cable tray installation requires proper anchoring. Pulling heavy cable bundles requires coordinated communication to prevent strain injuries.

GENERAL ORDER

Use pull strings and mechanical tuggers for long runs. Do not overfill cable trays beyond their rated capacity.

Key Hazards & Mitigation (The 'What If')

- Worker strains shoulder pulling cable — use mechanical assist or add personnel.
- Working above drop ceiling — beware of sharp grid edges and hidden wires.
- Ladder placed improperly to reach tray — use a lift or proper platform.

FIELD INSTRUCTION

Foreman: Coordinate the cable pull path and ensure all workers are positioned safely before the pull starts.
