TBT-31.06: Heavy Equipment Loading & Tie-Down

CSI Division: Div 31 | Track Assignment: Track 1 Civil & Earthwork

DIRECTIVE

All heavy equipment must be secured to the transport trailer using four independent tie-down points with DOT-rated chains and binders.

GENERAL ORDER

Clear the trailer deck of mud and ice before loading. The operator must wear a seatbelt during loading and unloading.

Key Hazards & Mitigation (The 'What If')

- Equipment slides on wet trailer deck — clean deck, load at low speed.
- Binder snaps open under tension — use cheater bars carefully, stand clear of the handle path.
- Chain rating is too low for the machine — verify WLL (Working Load Limit) matches the equipment weight.

FIELD INSTRUCTION

Foreman: Inspect all chains and binders for defects before the transport leaves the site.
